## FOR YOUR INFORMATION

### WATCH FOR WATER LEAKS

A running toilet can use up to 2 gallons of water per minute so it's important to check all your toilets often. Sometimes you cannot hear a running/leaking toilet. A good way to check is to put food coloring in the back tank of the toilet before you go to bed and if there is colored water in the bowl the next morning you know you have a leak. Be sure to monitor all your water taps to be sure they are not dripping or leaking. Even a pinhole leak can use 170 gallons in 24 hours. It pays to be vigilant when it comes to water leaks!

\*\*\*\*\*
